Biological programs enriched in co
Recurrent−only GSEA: .COL−Induced vs
adaptive immune response based on somatic recombination of immune receptors built from immunoglobulin superfamily domains
lymphocyte mediated immunity
B cell mediated immunity
immunoglobulin mediated immune response
leukocyte mediated immunity
antigen processing and presentation
response to molecule of bacterial origin
response to lipopolysaccharide
antigen processing and presentation of peptide antigen
cellular response to molecule of bacterial origin
positive regulation of cytokine production
cellular response to lipopolysaccharide
regulation of T cell proliferation
regulation of immune effector process
T cell mediated immunity
